The Sea of Oblivion.

would long since have swallowed up Sozobon, a man who with so many forgotten past pleasures and pleasures, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, disencumbering their fading whiteness; and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an insidious breath, invests it with its own fragrance.

Burglars at Work.

Last Friday night burglars entered the house of Mr. M. S. Gould, at Shopiere

and after using chloroform to quiet the inmates, robbed the house, taking a set of cameo jewelry, an open-face silver watch, of the William Ellery (Boston) make, No. 39,743, and \$1500 in money.

The burglars effected an entrance through one of the windows. During the same night they broke into the house of Mr. Salesbury, and got \$250. The impression seems to be that the thieves are professionals and are working eastward toward Delavan and Darion.

The glory of man is his strength. A motion prevailed that the board make a change of readers, all the commissioners voting yes except Commissioner Wilson.

A motion was then made that the Sheldon reader be adopted. Lost by a tie vote. Ayes—Commissioners Valentine and Bowles. Noes—Commissioners Atwood and Wilson.

A motion to adopt the Swinton reader was lost, also by a tie vote. Ayes—Commissioners Atwood and Valentine. Noes—Commissioners Bowles and Wilson.

The question appeared to be a very difficult one for the commissioners to handle, and further action was postponed until this (Monday) evening.

Mr. Richard Skelley sent in his resignation as janitor of the fifth ward school building, which was accepted, and Mr. John Baker was elected to that position.

No further business of public importance was transacted.

Three bottles of *Buckley's Bitters* cured him, and he tells us in a recent letter that he considers it the best family medicine now before the country for dyspepsia and liver complaint.

The Sale of the Farmers' Mill.

On Saturday afternoon the property known as the Farmers' mill on the south side of West Milwaukee street, was sold to Pliny Norcross, of this city, for the sum of \$23,000. This property was owned by Mrs. John Clark and Mrs. C. A. Allen, heirs of the estate of Clark & Allen, and had been in the market for a long time. Although it is a valuable piece of property, there was difficulty in making a sale; but the matter was placed in the hands of Messrs. Campbell & Stevens, real estate agents, and the result is the transfer of the mill and lots to Mr. Norcross for the price named. Beside the lot fronting on West Milwaukee street opposite Britton & Kimball & P. S. Lawrence & Co., the mill has the first water of the power in Janesville, and hence cannot fail to be especially valuable.

The sale of this mill shows what can be done by constant activity and thorough business qualifications on the part of the agent having the disposal of the property in hand. Messrs. Campbell & Stevens are untiring in their efforts to promote the interests of those who appoint them as agents to sell property; and with their industry are coupled an extensive knowledge of the business and an unshaken integrity which always commands confidence and attention. They enjoy a large acquaintance both here and at Madison, in fact all through southern Wisconsin, are thoroughly prompt and always reliable, and therefore meet with flattering success in securing buyers for property placed in their hands for sale. They have recently made other important sales, notice of which has already been made in the Gazette. This success sounds loudly in praise for that firm than any words in print can possibly do.

It is not yet known what will be done with the water power, but the lots will be improved in a short time. Buildings will be erected on the site of the Farmers' mill office, and in the alleyway adjoining the boot and shoe store of Richardson brothers, and also on the lot fronting on River street in rear of the McKee store. Mr. Norcross went to Chicago to-day, and on his return, which will be in the course of a week, something may be learned as to what disposition will be made of the water power connected with the property.

Still Booming.

The Milwaukee exposition is drawing large crowds this year, and is pronounced by all to be the finest exhibition of industrial products and works of art ever yet presented to the people of the northwest. The attendance from the country is increasing steadily, day by day, and thus far is considerably ahead of former years. During the first week of the exhibition over thirty thousand visitors passed the gates. Special days are being arranged by the management, among which is "Editor's Day" on September 19th, at which time all of the newspaper men of the state are invited to be present. A banquet will be served in their honor at three o'clock in the afternoon, and toasts will be given by prominent gentlemen. This will be a gala day at the exposition. On Tuesday, Sept. 25th, is "Soldiers' Day." Every military company and Grand Army Post in the state will be represented, and this day will be an eventful one to military men. A grand drill will take place in the afternoon and tableaux in the evening.

The general arrangement of the exhibits this year is meeting with universal favor, and the general points of interest in the exhibition are numerous and valuable. The Art Galleries, brilliantly lighted with incandescent lights, showing off the magnificent pictures to their best advantage, are the delight of all. The conservatory, filled with rare tropical plants, and with its garden-like appearance serves as a pleasant resort for both young and old. Manufacturers, and full operation, are of great interest, and that portion of the building is much frequented. In fact the whole exhibit is a success, and should be visited by every one in our state.

Competition for American Petroleum.

Sept. 17.—The first cargo of Russian petroleum ever landed in this country, arrived at Liverpool. The oil on inspection was found to be of excellent quality, and stood a high test. Great hopes have been built up by consumers on the strength of this sample, and the quantity of the petroleum which will soon begin to arrive from Russia will have the effect of completely revolutionizing the trade. The wells in Russia are principally in the hands of American experts who are good judges of the raw material, and the outlook, if reports may be believed, is that the United States will soon have a prominent competition in the production of this staple.
